## 1 Website Choice

### 1.1 Business Name: Hamba LTD

#### Organisation Description:

Hamba Ltd is a non-government organisation (NGO) that focuses on improving community development and promoting sustainability's. Our platform is design to help local communities with essential services, opportunities and so much more. We intend to bridge the gap between urban settlement and rural areas. Our main aim is to combat poverty especially in rural areas. We also raise awareness about environment issues and encourage people to take part in sustainable practices. The organisation aims to support local communities by providing information, resources and opportunities for growth.

We have helped numerous people across the country as it parts our daily motivation. For instance, Durban weather is one of the most extreme when it comes to rainfalls. There are extreme heavy rainfalls and floods that affects the communities, infrastructure, and the environment.

As Hamba LTD we play an essential role in helping these communities cope with these challenges. We provide emergency relief such as food, clean water, clothing, and temporary shelter during these disasters.

We offer comfort and support to the vulnerable groups and assist in building shelter and repairing of infrastructure. Hamba LTD also specialises in planting of trees and renewing of drainage systems and promoting sustainable living practices to reduce the impact of extreme weather.

## REASON FOR CHOOSING THE ORGANISATION

I chose Hamba LTD because I am interested in giving back to communities and promoting sustainable. I'm passionate in helping the needy as the quote says, "A HELING GOES A LONG WAY". This platform allows me to design a website that informs people and encourages positive change in society.

## WEBSITE GOALS AND OBJECTIVES:

Goals:

- Encouragement of community involvement
- To make it easier for user to contact the organisation
- Providing information about Hamba LTD
- To promote sustainability awareness

## 2. KEY PERFORMANCE INDICATORS:

HAMBA LTD (KPI's):

### 1.Website Traffic

- Measures the total number of visitors to the website
- It helps determine how people are of Hamba Ltd

### 2.Return visitors

- Indicators trust and continued interest in our website Hamba Ltd
- We track users who come back as that show interested, they are

### 3. Interaction

- Measures how users engage with our website

### 4.Time spent on our website

- If users stayed long; our content was interesting

## 3 TIMELINES AND MILESTONES

## HAMBA LTD WEBSITE:

| Phase   | Milestone                                                                                                                                                                                                                               | Duration/Date                                                    |

## 7.Current Website Analysis

Hamba LTD which operates under basic information website created in 2026. This analysis has been conducted to inform the redesigning of the website.

### 7.1 Strengths of the Existing Website

- Clear and organised layout
- Easy navigation between the pages
- Improves user experience
- There are functional design of CSS and HTML
- Includes headers and footers for better structure
- Easy for user to find information

### 7.2 Weakness and Areas of Improvement

- Some of the pages have simple styling
- No search engine optimisation (SEO) in place
- Missing social media feeds and review integration (e.g. Google Reviews etc)
- The site is not optimised for smartphones or tablets
- No live chats or WhatsApp integration
- Loading speed may need optimisation

## 8 Proposed Website Features and Functionality

### 8.1 Core Pages

- Homepage-linked to other pages, overview and entry point of the website
- About us-our NGO history, our team's profile, company background and brand personality.
- Sustainability-it explains the importance of protecting the environment and promoting sustainable practices.
- FAQ-displays the layout of finding common questions about our organisation.
- Contact- structured contact form, location map and WhatsApp integration
- Community-the community page is structured to highlight how Hamba LTD works with local communities to create positive change and support development.

### 8.2 key functionality

- Multi-Currency Display –ZAR as the primary, USD used as the conversion indicator.
- Social media integration – Instagram feed, sharing buttons.
- WhatsApp messages – for instant messaging

## 9. Design and User Experience

### 9.1 Design Aesthetic and Branding

The website design will reflect the Hamba LTD's identity, calmness, hope and support. The visual reflect awareness and it's appealing to our supporters.

|              |                                                                                         |
|--------------|-----------------------------------------------------------------------------------------|
| Design style | Modern style as it represents warmth, care and compassion.                              |
| Inspiration  | To create a simple, welcoming and user-friendly website that reflects the organisation. |
| Aesthetic    | Clean, modern and meaningful website that is visually appealing and easy to use.        |

### 9.2 colour scheme

|                |                         |      |
|----------------|-------------------------|------|
| Shades of pink | Roses pink              |      |
| Primary accent | Background and headings | Text |

### 9.3 Typography

|                 |                                                         |
|-----------------|---------------------------------------------------------|
| Primary heading | Display-soft for (NGO) name page titles and text        |
| Body copy font  | Regular- highly reasonable for descriptions and content |
| accent          | Bold, uppercases-used for buttons                       |
| Font hierarchy  | H1 70px-20px, body16px                                  |

### 9.4 Layout and Design approach
